

Noxus — Week 1: Onboarding, Foundation & Training

SUMMARY

To onboard students into the Noxus ecosystem, understand their current skills and interests, build their professional and technical presence, and provide the fundamental knowledge required for the upcoming weeks.

WEEK 1 OVERVIEW

Duration: 5 Days

WEEK 1 GOALS

- Complete their Noxus profile. - Provide academic and basic information. - Identify their current skills. - Select their technical interests. - Define their learning and career goals. - Create or connect professional profiles. - Understand Git and GitHub basics. - Create their first GitHub repository. - Explore different technical domains. - Understand teamwork and project development. - Complete a basic problem-solving activity. - Join the Noxus community.

DAY-WISE TRAINING PLAN

Day 1 — Noxus Orientation: Introduction to Noxus. Day 2 — Professional & Digital Presence: Building Your Digital Identity. Day 3 — Git & GitHub Basics: Introduction to Version Control. Day 4 — Skills & Domain Exploration: Exploring Technology Domains. Day 5 — Teamwork & Project Fundamentals: How Real Projects Are Built.

ADDITIONAL FOUNDATION TRAININGS

A. Communication & Teamwork B. Problem-Solving Fundamentals C. Introduction to AI Tools

STUDENT PROFILE SETUP

Basic Information: Full Name, Email Address, Profile Picture. Academic Information: College Name, Branch, Current Year, Semester, Roll Number / USN, Graduation Year.

SKILLS INFORMATION

Programming: C, C++, Python, Java, JavaScript. Web Development: HTML, CSS, React, Node.js. Electronics: Arduino, Embedded C, IoT, ESP32, PCB Design. Other Skills: CAD, UI/UX, Graphic Design, Video Editing, Technical Writing. Proficiency Levels: Beginner, Intermediate, Advanced.

STUDENT INTERESTS

Web Development, App Development, AI/ML, Data Science, Cybersecurity, Cloud/DevOps, IoT, Embedded Systems, Robotics, VLSI, Mechatronics, EV Technology, CAD, UI/UX, Research, Entrepreneurship.

STUDENT GOALS

Learn programming; Explore technical domains; Build real-world projects; Find teammates; Improve GitHub; Prepare for internships; Prepare for placements; Learn Electronics and IoT; Explore research; Build a startup.

INITIAL STUDENT ASSESSMENT

Questions include coding experience, project experience, GitHub experience, teamwork experience, and current technical experience level. Experience Levels: Complete Beginner, Beginner, Intermediate, Advanced.

WEEK 1 TASK CHECKLIST

Create account, complete profile and academic info, add skills/interests/goals, complete assessment, connect GitHub and profiles, create first repository, attend trainings, complete mini activity, join community.

WEEK 1 DASHBOARDS

Student Dashboard: Week progress, profile completion, task completion status, and readiness for Week 2. Admin Dashboard: Registration counts, completion stats, skills/interests trends, experience distribution, GitHub completion, attendance, and Week 1 completion percentage.

WEEK 1 DATABASE STRUCTURE

Tables: users, student_profiles, skills, student_skills, interests, student_interests, goals, student_goals, professional_profiles, assessments, training_sessions, training_attendance, onboarding_progress.

FINAL WEEK 1 DELIVERABLE

Complete Noxus account/profile, academic data, skills/interests/goals, initial assessment, GitHub setup with at least one repository, profile links, Git/GitHub fundamentals, domain awareness, teamwork/project understanding, problem-solving exposure, responsible AI awareness, and completion of all required Week 1 activities.

WEEK 1 FINAL FLOW

Onboard → Create Profile → Identify Skills → Select Interests → Define Goals → Build Digital Presence → Learn Git & GitHub → Explore Technical Domains → Understand Teamwork → Learn Project Fundamentals → Complete Mini Activity → Complete Week 1 → Ready for Week 2
